Automatic Width Control Cylinder Case Study

Automatic Width Control (AWC) Hydraulic Cylinder supplied to Henan a Hot Roughing Mill in China. The design was prepared by our team at Bradford to suit a specific application given by the client.

The cylinder operates at a maximum speed of 200mm and a bronze aluminium thrust pad was incorporated into the design to allow for cushioned engagement with the mating part in service.

Four units supplied – 440mm bore with 320mm rod x 1820mm
