Lock Gate Cylinders

New cylinders designed & supplied by Bradford to NOELL GmbH in 1996 for installation at Cardiff Bay South Wales. 44 units supplied in total.

Heavy duty cylinder designed to open and close the lock gate. The assembly has been designed with welded covers to protect the installation from water egress. Additionally, the piston rod is made from stainless steel, and the cylinders will have a paint finish suitable for the environment.

When the cylinder is fully extended it measures 5 metres from the back of the cylinder to the end of the clevis, 300mm bore with 150mm diameter rod x 3600mm long.
